

BELLEHELEN IS WINNER, SAYS L. A. BROKER

Becomes Interested in Leading Mine of District and Will So Instruct Clients.

"Bellehelen certainly looks like a winner," remarked A. A. Alton, Los Angeles broker, who made an inspection of the holdings of the Bellehelen Merger Mines company, Saturday, in company with W. P. Gray, well known mining man, and John Sickman, a capitalist of the southern city. "The ore is there in abundance and furthermore, it carries good silver values and can be treated at a substantial profit with proper milling facilities."

Mr. Alton, who is a member of the brokerage firm of Alton, Miller & Co., of Los Angeles, who so highly pleased over the ore possibilities that he announced his firm would become interested in the Bellehelen Merger Mines company, and that they would also recommend to their clients the advisability of becoming interested that the necessary finances may be secured without delay, that active mining and milling operations may be inaugurated upon a broad scale.

"I was in Tonopah over a year ago," continued Mr. Alton, "and at that time Mr. Gray wanted me to inspect the Bellehelen mine, but I did not find time, so I have discovered that I overlooked one of the best bets that was ever called to my attention. My firm never goes into any proposition until we have made a personal examination and I am satisfied that the Bellehelen district is due for a great deal of activity during the summer and fall."

Messrs. Gray, Alton and Sickman left Saturday afternoon for Los Angeles, but Mr. Alton stated before taking his departure he would return in two weeks and that he would take the airplane route effecting a landing on the alkali lake on the Silver Bow road, about three miles from Tonopah.

Mr. Sickman was also highly pleased over the showing of the Bellehelen mine and announced that he would have something to say in a very short time that would redound to the best interests of Tonopah in particular.

SCHOOL FIRE DRILL PROVES INTERESTING

Fire drill at the public school was conducted this morning in the presence of the fire department, and by actual timing, the 650 pupils made their exit from the building in one minute. At the time the scouts went through each room within the period above mentioned.

AMUSEMENTS

GLORIA SWANSON AT THE BUTLER TODAY

Gloria Swanson, the popular Paramount star, who has been called the best dressed woman on the screen, will be seen at the Butler today in her latest picture, "Her Husband's Trademark," which in this case is a gorgeously dressed wife. The husband is not wealthy, but hopes to attain wealth by making a show of wealth. However, a mutual friend of both husband and wife returns after gaining wealth and greatness, falls in love with the wife, and the husband, to promote selfish, financial ends, rather encourages the romance. The situation culminates in a very powerful climax in Mexico where, after a thrilling fight with bandits, the husband is killed and the two lovers find the triumph of their righteous unselfish love. Stuart Holmes plays the husband with all his old-time villainous, suave finesse. Richard Wayne is the leading man.

Tomorrow, Anita Stewart, in "The Invisible Fear," a gripping story from start to finish.

MRS. F. M. NORTH left yesterday for her home at Manhattan after a short visit with her husband, who serves as deputy collector of internal revenue.

Before leaving here Mr. Bennett resigned as chairman of the democratic county central committee of Nye county and was succeeded by Ben D. Luce.

MIDWAY SHOWING IS MOST ENCOURAGING

A new vein is being exploited on the 1200 level of the Midway mine. This vein was encountered following the driving of the northeast drift for a distance of 75 feet at which time another fault was encountered. This was on the vein where an important discovery was reported a short time ago, and which has been showing intermittent stringers of high grade ore. The quartz is heavily mineralized in the drift and indications are that an onebody of good dimensions is about to put in an appearance. The showing on the 1200 level at this particular point is most encouraging and the drift to the northeast will be continued indefinitely to pass the fault as quickly as possible.
